

HARSHIT KUMAR PATEL

Associate Product Manager | AI Product Management | Product Strategy

Chennai, India | +91 6386226495 | work.harshitpatel@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on product management experience across AI product development, customer research, and startup execution. Skilled at running product discovery, writing PRDs and user stories, and turning research into roadmaps. Built and shipped multiple AI-driven products end to end, and founded and operate a live consumer platform from concept through launch. Looking to bring this product and AI background to an Associate Product Manager or AI Product Manager role.

CORE SKILLS

Product Management: Product discovery, user research, customer interviews, product strategy, roadmapping, PRDs, user stories, feature prioritization, MVP planning, Agile/Scrum, sprint planning, backlog management, product analytics, go-to-market strategy, stakeholder management

AI & Technical: Large language models (LLMs), prompt engineering, prompt evaluation, AI product development, AI workflow design, OpenAI APIs, Azure AI, Git, GitHub, Supabase, Vercel

Tools: Figma, Jira, Notion, Miro, Google Workspace, wireframing, user journey mapping

PROFESSIONAL EXPERIENCE

Founder | Nakshatraa.online (Jul 2026 – Present)

- Founded and launched an AI-powered consultation platform offering astrology, relationship, and life-guidance services, taking it from concept to a live, customer-facing product.
- Ran customer discovery interviews to validate demand and shape the service offering and pricing.
- Designed the full customer journey, including onboarding, booking, consultation flow, payments, and retention.
- Own the product roadmap end to end: prioritize features based on customer feedback, and drive SEO and organic growth strategy.

LLM Post-Training Intern | Ethara AI (Jan 2026 – Jun 2026)

- Evaluated large language model outputs for reasoning quality, factual accuracy, and instruction following.
- Supported supervised fine-tuning (SFT) workflows and dataset refinement to improve post-training performance.
- Worked on improving model alignment and response consistency across a wide range of prompts.

Product Research Intern | Institute for Global Research on Public Policy & the SDGs (Jan 2026 – Jun 2026)

- Conducted market research and product discovery for AI and EdTech initiatives.
- Identified customer pain points through qualitative research and secondary analysis.
- Turned research findings into product recommendations that fed directly into roadmap planning.

Computer Science Faculty | Sant Sai Shikshan Sansthan (Jul 2025)

- Delivered practical, application-based Computer Science instruction and improved student engagement through structured lesson planning.

PRODUCT PROJECTS

AI Product Execution Copilot | AI SaaS for Product Managers

- Designed an AI workflow that converts meeting transcripts into PRDs, user stories, Jira tickets, and execution plans.
- Ran user research with product managers to identify execution bottlenecks, mapped the product lifecycle from discovery through MVP, and defined success metrics around documentation efficiency and execution speed.

PathByte | AI Career Growth Platform (Live)

- Built and launched a roadmap-first career guidance platform that helps students follow structured learning paths.
- Ran customer discovery to pinpoint learning fragmentation and decision fatigue, then designed onboarding, personalized learning journeys, and progress tracking, plus MVP scope and monetization opportunities.

ConvoHub | Academic Communication Platform – Case Study

- Designed a platform separating institutional announcements from peer discussions, based on user interviews on student communication pain points.

- Built personas, user flows, and a feature prioritization plan to guide the design.

Inventura | AI Inventory Assistant – Case Study

- Designed an AI-powered inventory assistant for small and medium businesses, including AI-based demand forecasting and a community inventory exchange.
- Created offline-first workflows tailored to local retailers with limited connectivity.

CERTIFICATIONS

Product Management: Google Project Management; AI Product Management (Coursera)

Artificial Intelligence: Microsoft Azure AI Engineer Associate; Microsoft Semantic Kernel; GitHub Copilot; Google Cloud Generative AI Leader

Technical: NVIDIA Networking; NVIDIA NLP Fundamentals
